

INDEX

- accounting and business reform: basic error of, 164n.; socialist foundation of, 164, 277-278
- anarcho-capitalism: 56n.-57n.
- arbitration: 39
- artificial intelligence: 70n.
- Austrian school: the main contribution of, according to Mises, 128; content of the alternative paradigm of, 294; increasing influence of, 294n.; conversion of Mark Blaug, 155n.-156n.; young theorists, 314-315
- average cost rule: Lerner's criticism of Lange and Durbin, 285
- Bayes's theorem: 22
- bonuses or incentives (system of): 211, 255-257, 280-283
- bureaucracy: ignorance, in Lange's model, of the typical behavior of bureaucratic agencies, 252-257; tendency toward overexpansion, 84; Mises's theory of the pernicious and inevitable emergence of bureaucracy under socialism, 253
- business consolidation: 142-145
- capital and interest: subjective theory, 13; criticism of the theory of capital efficiency, 13
- capital good: definition, 239-240
- capitalism: as an entrepreneurial system, not a managerial system, 283
- capitalist system: entrepreneurial, rather than managerial, nature of, 283
- capitalist, as an entrepreneur: 43-44
- Chicago school: criticism of, 290n.-291n., 294; the clumsy positivist scientism of, 310n.
- ciencismo*: 100n.
- cientificismo*: 100n.
- coercion: kinds, systematic and asystematic, 56; definition, 55n.; effects of, 58-59; types, 55n.
- competition: artificial, 202-203; concept of, 47-48; etymological definition, 47n.; "peaceful" or "friendly" (*Freundlichen Wettbewerb*), Heimann's concept of, 202-203; and coordination, 48; and entrepreneurship, 47-48; see *pseudo-competition*
- "competitive" solution (to the problem of economic calculation): historical precedents for (E. Heimann and K. Polanyi), 202-206; early criticism leveled by Mises and Hayek against, 206-214; implicit acknowledgement of the soundness of Mises's contribution, 199-201; contradiction, 291-293, see *market socialism*

computational or algebraic argument in Hayek:
 its secondary nature with respect to the main
 epistemological argument, 168-170; its
 unnecessary and irrelevant nature according
 to Mises, 171-172

computer science: the development of and the
 impossibility of socialism, 69-73; criticism
 of Lange's theory on, 264-266

computers: and the impossibility of socialism,
 69-73; criticism of Lange's theory on, 264-
 266

computopia: see *planometrics*

conservatism: "right-wing" socialism, 98-99;
 Hayek's criticism of, 99

constructivist rationalism: 112; and social
 engineering (see *scientism*)

consumer market: a true one is lacking in
 Lange's model, 241-242

consumer: as entrepreneur, 44

coordination and adjustment: 37; competition,
 47; core of the social process, 37-38

corruption: inevitable result of socialism, 81-83

cost: as a subjective concept, 23

counterspeculation: Lerner's concept of, 288n.-
 289n.

creativity: 22; essence, 33; as defined by Saint
 Thomas Aquinas, 33n., and entrepreneurship
 (theological digression), 34n.-35n.;
 creativity versus maximization, 51-52

debate on socialist economic calculation:
 background and prehistory, 112-121;
 summary, 7-8; consequences for the future
 development of economics, 12-15

demarchy: 97

destructionism: 302; inevitable result of
 socialism, 302n.

discoordination and social disorder: inevitable
 result of socialism, 74-79

division of knowledge: 49-51; population
 growth, 49

division of labor: (see *division of knowledge*)

Durbin's rules: 270-271

economic analysis of law: criticism of the static
 model, 15

economic calculation: generic definition, 30;
 etymological definition, 38n.; money and
 economic calculation, 42-43; strict
 definition, 43; Mises's definition, 43n.;
 impossibility of economic calculation under
 socialism, 59-68; "bridge" between the
 internal (ordinal) and external (cardinal)
 realms, 121n.; impossibility; the
 computational or algebraic argument and the
 epistemological argument, 128; practical
 sufficiency of economic calculation, 139;
 impossibility of calculation *in natura*, 138,
 146-148; calculation in labor hours, 148-
 150; calculation in units of utility, 150-152

economic equilibrium: 115-117; irrelevant nature of the theory of, 126

economic problem: definition, distinction between economic and technical or technological problems, 141-142; non-technical nature of, 51-52

economic welfare theory: 14; errors of, 196-197

economics and technique, differences between: 141-142

economics: redundant definition, 20n.; objective nature of, 24n.; purpose of, 52n.; concerns spiritual realities (ideas and knowledge) and not objects, 125n., 141n.-142n.

efficiency and ethics: false separation between, 300n.

enterprise: as a synonym for “action,” 18-19; as a “firm,” or unit of economic organization, 42n.

entrepreneurial alertness: 25-26

entrepreneurial error: Kirzner’s conception of, 39n.

entrepreneurial knowledge: characteristics of, 26-39; subjective and practical nature of, 27; relationship between practical and scientific knowledge, 27n.-28n.; exclusive and dispersed nature of, 29; tacit, inarticulable nature of, 31; creation and transmission of, 36-37

entrepreneurial loss: 24

entrepreneurial profit: definition, 23; and Pope John Paul II, 24n.; “pure” entrepreneurial profit, 33-34

entrepreneurship: broad definition, 18; etymology, 18-19; alertness, 25-26; fundamentally creative nature of, 33; theological digression, 34n.; ubiquity of, 43; essential principle, 44; and competition, 47; and the concept of socialism, 53

ethics: and socialism, 16; and efficiency, 300n.

expectations: 22

exploitation (theory of): see *surplus value*

financial accounting, 33; cost accounting, 33

formal similarity: arguments of, between capitalism and socialism: 153-160; impossibility of eliminating the category of value, 155, 155n.; impossibility of eliminating the category of interest, 156, 156n.; Barone’s argument, 157-159; the arguments of Cassel and Lindahl, 159, 160n.

functional theory of price determination: 13; criticism of and need for replacement with a praxeological or sequential theory, 249-250, 272-273, 273n.

Gödel’s theorem: 31n.-32n.

governing or coercive body: higher level in a socialist system, 65-68

Hayek: secondary importance he attaches to the algebraic or computational argument with

respect to the epistemological one, 168-172;

his critical reference to the farce of planometrics, 191; his concept of “order,” 75; his key distinction between dispersed and centralized knowledge, 27n.-28n., 29-31; his criticism of unlimited power in democracy, 97; his criticism of conservatism, 99n.

human action: definition, 20; and scarcity, 20; ultimate given, 24; marginal utility and time preference, 25

ignorance (inevitable): of the directing authorities in a socialist system, 67

immorality as an absence of principles: typical in socialist systems, 90-91; Keynes’s self-description as an immoralist, 90-91; the three senses in which socialism is immoral, 307n.

incentive: definition, 45n.; the two different meanings of the term, 281-282

industry or sector: impossibility of defining unequivocally, 210

information transparency: obsession of socialists with, 164n., 277

information: (see *entrepreneurial knowledge*)

institutional aggression: theory of, 4; see *coercion*

institutions: definition, 40n.; Menger’s theory on the emergence of, 41n.

intellectual division of labor: 123

interest rate: arbitrary fixing of in Lange’s model, 251-252

interpersonal exchange: “bridge” between the subjective (ordinal) and external (cardinal) realms, 121n.

interventionism: 14; as a type of socialism, 108-109

intrapreneurship: 144

irregular economy: 85

irresponsibility (typical consequence of socialism): concept of, 79; effects on the environment, 80

isonomy: 98n.

just price: 66n.

justice: the inevitable corruption of under socialism, 87-90

Keynes: his lack of principles and his immorality, 90-91

kosmos: natural, spontaneous order, 112

labor market: a true one is lacking in Lange’s model, 241-242

labor unions: exercise of systematic coercion and violence by, 57n.-58n.

Lange’s classic model: criticism of, 238-259; description of, 235-237; two possible interpretations of, 237-238

Lange’s rules: 236-237; inanity of, 243-248

Lange-Breit model: 215-217

Lange-Lerner rule: 243n.-244n.

law: 40

- law: criticism of Saint Thomas Aquinas's concept of, 41n.; of association, 49n.; substantive, 87
- Lerner's rule: 285-286
- marginal cost rule: Mises's and Hayek's early criticism of, 205, 209; Lange's version and criticism thereof, 243-248; Lerner's version and criticism thereof, 285-287
- market and common law: parallelism, 113n.
- market price: concept radically different from that of parametric price, 137; 231-233
- market socialism: Maurice H. Dobb's criticism of, 298-299; pathos of, 200n.-201n.; contradiction inherent in, 291-293; see *competitive solution*
- market: concept of, 52; Lange's view of as a mechanism of the pre-electronic age, 264-265; criticism of this position, 266n.
- Marx: socialism according to, 130-135; his dynamic criticism of capitalism, including his view of the role institutions play, 131; dictatorship of the proletariat as the imposition of a normative equilibrium, 130; Marx's essential error, 132; Mises's refutation of Marx's analysis, 135-138, 145n.
- Marxism: as justification for a normative equilibrium, 130; as a utopian socialism, 132
- mathematical economists: errors of, 195-196, 196n., 273, 273n.
- mathematical equilibrium analysis: errors and confusion it generates, 184n., 196n.
- "mathematical" solution (to the problem of economic calculation): 160-172; contribution of Fred M. Taylor, 161; contribution of H. D. Dickinson, 163; contribution of Kläre Tisch, 166-167, 167n.; adverse consequences for the debate, 167-172
- mathematics: criticism of the use of in economics, 154, 195-196, 196n., 273, 273n.
- maximization: criticism, 141-142
- means: definition, 20
- mechanisms for resource allocation (theory of): see *planometrics*
- mental images of the future: (see *expectations*)
- method of economic science: 12; criticism of positivism, 310-311, 311n.
- Mises: start of the debate on socialist economic calculation: 112-121; essential contribution of, 121-129; his concept of market price, 137; his concept of competition, 137; evolution and summary of his arguments on the impossibility of economic calculation, 175n.; his original argument against the trial and error method, 178-179
- money: 40; definition, 42; Menger's theory on the emergence of, 42n.; disappearance of in

the equilibrium model, 136n.; non-existence of real money in a socialist system, 136

obligatory accounting information: superfluous nature of, 164n.

“omniscience” and “omnipresence” of the government: 279, 279n.

order: concept of, 75; spontaneous, 92; hierarchical and etymology, 92

paradox of planning: 21n., 68n., 77

parametric prices: definition of, 219

partial, Marshallian equilibrium: 161n.-162n., 274

plan: concept and types of, 21n.

planning: central, 21n., indicative, 10-11, 21n., paradox of, 21n., 68n., 77

planometrics: definition of, 182n.; objective of, 182-187; frustration and disappointment caused by, 183n.-184n.; criticism of, 187-197

polycentric and hierarchical structures (M. Polanyi’s theory): 245n.

population: impossibility that socialism could maintain increasing volumes of, 119; increase in as the cause and necessary condition of economic development, 49-51

positive legislation and socialism: parallelism between, 113n.

positivism: criticism of, 310-311

praxeology: 24n., 52n.

price: dynamic theory of, 13; criticism of the functional theory of, 273n.

probability: of class, 22n., of a unique event, 22n.

production functions: 230

propaganda: excessive use of in socialist systems, 83

pseudo-competition: 208; see *competition: artificial*

public choice (school of): see *school of public choice*

public choice school: 83n., 252-257

public goods: criticism of the static nature of the theory of, 14-15

rate of interest: see *interest rate*

responsibility: economic concept of, 68, 79n.-80n.; absence of in socialist systems, 79

scarcity: prerequisite for human action, 20; scarcity as a typical effect of socialism, 78; false automatic indicator in the “trial and error” method, 176-177; chronic, recurrent feature of the socialist system, 176

scientific knowledge: the tacit foundation of, 27n., 32n.

scientism: 100-103; definition, 100n.; positivist scientism of the Chicago school, 310n.

serendipity: definition of, 23n.; history of the term’s formation, 23n.

social “Big Bang”: 48n.-49n.

social democracy: 96-98

social disorder: 74-79

social engineering: 100-103

social ethics: most recent Austrian contributions, 307n.

social justice: criticism of the concept of, 89, 89n., 92

socialism: self-management, 10; extensive and voluntaristic nature of, 80; types of socialism, 95-105; as an intellectual error, 59-61; as the opium of the people, 93-94; traditional concept of, criticism, 105-108; idyllic concepts of, 109-110; conservative (or right-wing), 98-99; Christian or solidarity-based, 104-105; definition of, 4, 53-55; effects of, 74-93; guild (proposed by K. Polanyi), 205; ethical inadmissibility of, 16; moral perversion socialism creates, 90-91; prostitution of the traditional concepts of law and justice, 87-90; real, 95; lag in economic, technological, and cultural development, 85-87; historic failure of, 1; theoretical impossibility of from the standpoint of society, 62-65; from the standpoint of the governing body, 65-68; theory on the prevention and dismantling of, 16-17; and computers, 69-73

socialist megalomania: 84

society: concept of, 52; and market, 52n.

solidarity: correct and spurious concepts of, 89n.

speculation: 39

Stalinism: Lange's praise of, 263-266

statistics: the obsessive proliferation of under socialism, 80

subjectivism: definition of, 3

supply and demand functions: non-existence of, 249, 272-273; criticism of the functional theory of prices, 273n.

surplus value (theory of): criticism, 133-134, 133n.

surprise: definition of, 23n.

tâtonnement: 235-236

technique and economics, difference between: 141-142

technique and social engineering: 100-103, 308n.-309n.

technological revolution: 144

temporal present: Mises's definition of, 39n.

theoretical impossibility of socialism: "static" argument, 62-63; dynamic argument, 63-65

theory and praxis: false dichotomy between, 126n.

time preference (law of): 25

time: subjective concept of, 21-22

transaction costs: criticism of the theory of, 144n.-145n., 290n.-291n.

trial and error method: 172-182; description of, 173-174; criticism of, 174-182; additional errors committed by Lange, 248-251

uncertainty: the permanent nature of, 22; Arrow's mistake concerning, 276n., 302n.

underground economy: (see *irregular economy*)

unemployment (concealed): inevitable consequence of socialism, 78-79

utility: definition of, 20; marginal (law of), 25

value: definition of, 20; unnecessary, according to Engels, 134-135; economic category of socialism, 155-156

voluntarism: typical characteristic of socialism, 80

Walras (model of): criticism of the static nature of, 185n.

Walrasian paradigm: crisis of the, 184n.-185n.

"weasel words": 89n.

worker (as entrepreneur): 43

x-inefficiency and entrepreneurial error: 145n.
